Work Experiences

Senior UX/UI Designer

July 2025- Present

TLScontakt

- Leading the end-to-end UX/UI design for a next-generation biometric data capture kiosk, focusing on optimizing user flow for speed and minimizing transaction time.
- Implementing stringent accessibility standards (WCAG) to ensure the self-service kiosk is universally usable.
- Presented design recommendations to executive leadership & business owners across multiple countries, building consensus around user-centered decisions.
- Conducted research across 10 international visa centers with users from diverse backgrounds to validate design improvements and identify cultural considerations.

UX/UI Designer for Palantir Foundry

May 2023 - June 2025

FORVIA Faurecia

Led Design System Creation/Implementation :

- Developed design systems for our design team and developers, and Documented the best practices, dos and don'ts, and usage examples for data dashboards

User-Centered Dashboard and Use Cases Development on Palantir :

- Designed intuitive and visually appealing dashboard interfaces that facilitated efficient data exploration and decision-making.
- Incorporated feedback to iterate on designs and improve usability.

Performed Comprehensive UX Audits :

- Conducted thorough end-to-end audits of user experiences within data applications developed using Palantir Foundry.

Facilitated Ideation Workshop in Paris Nanterre (R&D Project)

UX/UI Product Designer

Oct. 2020 - May 2023

Addinn group

Project Needs Assessment creation :

- Conducted in-depth interviews with product owners and stakeholders for various projects, including SynapseHR, Smartweb Pay, and Lait's Collecte.
- Identified and documented unique project requirements based on these interactions.
- Applied a rigorous UX audit procedure to ensure better usability.

Critical Banking and Financial Project Design :

- Ensured the successful launch of a secure and intuitive platform for users.
- Monitored closed beta user analytics and A/B tested results.
